ControlLogix HART Analog I/O Modules User Manual

The Allen-Bradley 1756-IF16H is a HART Analog I/O module that connects a Logix controller to your process. This particular input module is one of those that receive signals from process value transmitters and then convert them to their equivalent measurement values for use in the controller, i.e. flow, temperature, pressure, or pH.

A useful function of the 1756-IF16H module is the under range and over range detection system through which it lets the module know if it is operating outside the limits of the input range. The digital filter feature smoothes out the variations of the input noise and it does so on a per channel basis.
