Animal - Wikipedia

Animal, any of a group of multicellular eukaryotic organisms thought to have evolved independently from the unicellular eukaryotes. Animals differ from other multicellular eukaryotes, the plants and the fungi, in morphology and physiology in that animals evolved muscles, which allow them to be mobile.

ANIMAL - Art, New York City, Culture, Politics, and Opinion

The official New York state animal is the beaver. The beaver was named the New York state animal in 1975. It was chosen because of the importance that beavers held for early settlers in the area; fur trade and traders settled in the Albany area in the 1600s and established New York as one of the pivotal settlements in America's early history.
