is the mainstay of Subaru's engine line, with all engines of this series being 16-valve horizontal flat-fours, with configurations available for single, or double-overhead camshaft arrangements (SOHC or DOHC).

Subaru EJ engine - Wikipedia

OK! regarding piston rod direction, some folks say to install the Rods with bearing tang down (facing crankshaft forward). However this theory does not make much sense, because this is a boxer engine. This is why when you have all the rods with tangs facing down....only #1 and #4 will be correct #2 and #3 will be facing up.

which way do the conn. rods face ? - NASIOC

The original Subaru piston has almost no skirt, causing the cylinder bore to wear in the middle, eventually causing "piston slap". We use Hastings piston rings, which are very high quality

The EJ25D power is 155 HP at 5,600 rpm. In 1997 pistons were modified, and power increased to 165 HP. This motor was used for Subaru till 1998, then it was replaced by EJ251 engine. EJ251 belongs to Phase 2 and it used new SOHC heads, one camshaft for each. Also new moly coated pistons were used, and compression ration was increased to 10.1.

Subaru EJ25 Engine | Tuning guide, main problems, specs

So I bought a 99 sohc EJ25 Forester with a bad motor, which will eventually be my wife's car. When I bought it it would run at idle, but just barely. It pretty much sounded like an extremely bad rod bearing, which it was. Pulled the motor and broke it down to find the oil pickup screen almost...

Total Rebuild 99 sohc, Oversized Pistons | Subaru Forester ...

(The plugs are removed to gain access to the piston wrist pins when the pistons are set to "bottom dead center".) I believe the plugs close openings into the crankcase area. Seems to me it would take quite a leak to get oil past the gasket and the thread sealant, especially as that shouldn't be a high oil pressure area.
