fuel the engine burns.

In MPI systems, the injection generally takes place directly inside the cylinder's intake valve. Types of MPI Systems

Depending on how the injection is handled, MPI systems fall into several types.

The Engine Guardian System monitors the critical sensors on the engine for any early indications of problems. The system will respond to a problem by emitting a continuous beep and/or reducing engine power in order to provide engine protection. If Guardian System has been activated, reduce throttle speed.
