Resilience Thinking: Sustaining Ecosystems and People in a Changing World. Increasingly, cracks are appearing in the capacity of communities, ecosystems, and landscapes to provide the goods and services that sustain our planet's well-being. The response from most quarters has been for "more of the same" that created the situation in the first place: more control, more intensification, and greater efficiency."Resilience thinking" offers

A resilience thinking approach investigates how these interacting systems of people and nature can best be managed in the face of disturbances, surprises and uncertainty. We define resilience as the capacity of a system, be it an individual, a forest, a city or an economy, to deal with change and continue to develop.

Applying resilience thinking - Stockholm Resilience Centre

A resilience thinking approach tries to investigate how these interacting systems of people and nature - or social-ecological systems - can best be managed to ensure a sustainable and resilient supply of the essential ecosystem services on which humanity depends.
